

If you are undergoing surgery, endoscopic treatment, angiography, dental treatment, etc., and you are taking anti-thrombotic medication (medication that thins the blood), please be sure to inform your doctor.

Your medication may have been prescribed by another hospital. Please bring your "Medication Handbook" that shows what you are currently taking and show it to your doctor.

A list of the medication you are taking is very important. If we do not know your medications, we may not be able to provide you with new medications as well as surgery or treatment.
