

Dr. NGO VAN CONG (チョーライ病院 耳鼻咽喉科/2016年8月21日～9月3日)

I would like to extend my special thanks to IMC department at UTH (Dr. Akiyama) and ENT department (especially Dr. Tanaka) have given me the chance to come to UTH to train during 2 weeks. Despite of very short term, we have received many experiences in specialty and examination treatment and surgery procedure at UTH. Learning experiences from the good professors and experiences in endoscopy for ENT with kindly guidance from Dr. Tanaka. From there, I have applied endoscopy techniques in skull base tumor surgery at ENT department of CRH to reach fruitful results.

I hope in the near future, I could come to UTH again to learn more about skull base tumor surgery by endoscopy with experienced doctor like Dr. Tanaka to accumulate more experiences in treatment for skull base tumor patients at ENT department of CRH.

Endoscopy application in treatment of skull base tumor at ENT department

On site study with Dr. Tanaka in skull base tumor surgery by endoscopy

Participate teleconference at Tsukuba

Dr. Akiyama granted certificate when finishing the course.
