

TRINH PHAM MY LE (チョーライ病院 内視鏡医／2016年9月3日～17日)

First of all, I would like to express my sincere thanks to all doctors, nurses and staffs of Endoscopy Department of University of Tsukuba Hospital. I received kind helps and supports from them during the time I studied in the Department of Endoscopy.

The Endoscopy Department has well-equipped with magnifying endoscopy systems, this is very important for diagnosis of early cancer. In Viet Nam, we hardly detect early lesions without magnification endoscopy system.

All of members in Tsukuba hospital were very kind and friendly. They were always willing to help me, explain my questions carefully.

Endoscopists in the Department of Endoscopy have been well trained with good knowledge and skills for variety of endoscopic procedures. I would like to deeply thank them very much again.

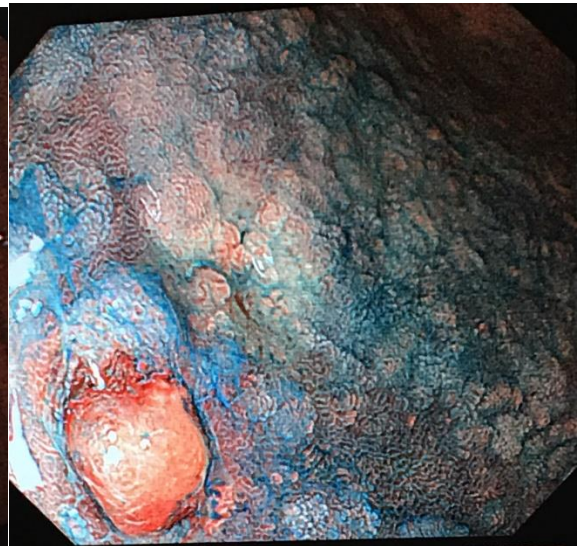

I would like to take this opportunity to express my profound gratitude and extend my sincere appreciation to:

- Prof. Akira Matsumura - Director of the University of Tsukuba Hospital
- Prof. Minoru Akiyama - Chief, International Medical Center (IMC)
- Prof. Yuji Mizokami - Director of Endoscopy Center and all gastroenterologists
- Prof. Ichinosuke Hyodo - Chief of Gastroenterology Department
- Ms. Megumi Fukaya - Coordinator of IMC

Thank you very much for all your supports. I have had the great stay in Tsukuba. I did really enjoy it.

Early Duodenum Cancer

Early Gastric Cancer
