

NGUYEN THI XUAN HOANG (チョーライ病院 ICU/2016年10月30日～11月12日)

Two weeks in University of Tsukuba Hospital was my amazing experience in field of resuscitation and emergency. I were warmly welcomed and got a comfortable room. Besides that, professor Inoue is dynamic and friendly. He guided me with all his heart. His team is professional and team working. Include that, I would like to say thank the “2016 Promotion program of health and medical technologies to foreign countries” to give a change for ChoRay Hospital Doctor who can come and study in Japan. I hope the connection between CRH and UTH be continuous and close. In future, if I had an occasion, I would come back there and have a long time to study.
