

Nguyen Truong Truc Lam (チヨールイ病院 消化器外科医 / 2017 年 6 月 12 日～16 日)

The second time back to Japan. My feeling of being at Narita Airport is the friendliness of the Japanese and the special staff of the airport. Feeling alienated due to linguistic differences quickly passed with the help of dedicated staff airport. Unlike Tokyo, the busiest city in the world, the city of Tsukuba is peaceful, beautiful, with many universities, research institutes, and hospitals. Here I met many students, doctors from all over the world. From the inn, I went to the hospital on a bike, an enjoyable experience after 30 years, from a medical university student. Unlike transportation, Tsukuba University Hospital has many modern machines, with many good doctors. Although only a week, but I also learned a lot from the doctors, professors are good at the hospital .. surgical removal of endoscopic sigma endoscopy, surgery of the entire thyroid gland with scrotal lymph nodes, surgical cutting Breast cancer with glaucoma ... telemedicine conference between Cho Ray Hospital, Tsukuba Hospital and Thailand Hospital 1 week passed quickly, but I have many beautiful memories. Hopefully I will have the opportunity to return to Tsukuba
