

Phung Nguyen The Nguyen (ホーチミン医科薬科大学 小児科医 / 2017年7月24日～8月5日)

Japanese medical education and training system has special and different features with Viet Nam system. Your system has consensus and implement all over the country. It is compulsory program from government. So it is successful. It helps to shortage time of education and training. It is easy to have statistic parameters of residents. It has opportunity for students to try studying to get job. I hope this can imply in Viet Nam

As you know, our education and training system is completely different. It will take a long time to make the 18 month program as the same your program. But we need to change to make our medical education better.

I think we also need a EPOC in Vietnamese to run our program. It means that we need to do a lot of things to make it true and also the money to run project.

Thank you very much for creating a good chance for us to know more about Japanese medical education system. I also thank Prof Akiyama, Prof Maeno, Prof Inoue, ... for welcome us and help us to understand more. It is very kind of Ms Fukaya to manage us 3 days at prefectural hospitals.

I really appreciate your help with our program.
