

■ ドン ゲエン フェン ウエン(ICU 看護師) 2015年9月6日～9月20日

<看護部 受入・研修担当>

- 1) 杉本 敬子 看護師長 (国際・研究担当)
- 2) 卯野木 健 ICU 看護師長
- 3) 柴 優子 ICU 副看護師長
- 4) 全 ICU 看護師

This is the first time I come to Japan and University Tsukuba Hospital. Most of time I stayed at ICU and during my short training and visiting I had observed many nursing activities under supervision of Mr Unoki, Ms Shiba, Ms Keiko and with helped of all ICU nurses.

The visit helped me a lots to understand how take care of patients with best outcomes and at least complications. I know the information management system, which collects data from the patients, follows up post-operative patients and performs clinical research Specially, ICU is a lose ICU where have many modern equipment, clean environment, all nurse work professional, carefully and close ICU model helps improving knowledge and ability of nurse confident. I am very impressive about the spirit of teamwork.

After this short term studying at ICU I study a lot of postoperative patients management such as setting up the equipment, management of various catheter and drainage tubes, respiratory nursing care, rehabilitation nursing care (early weaning, T-cannula protocol, assisting a patient with ambulation using a walker,...) assessment of nutrition status and preparation of transfer patient

Finally, I would like to thanks Prof. Akira Matsumura – Director of TUH, Prof Akiyama, Ms Keiko, Ms Shiba, Mr Unoki and OPMA gave me a chance to study and share experiences in nursing care critical patient and nursing management

Receive certify from Prof Akiyama after finish training

With ICU nurses at TUH
