Firstly I appreciate the help and support provided by Tsukuba University Hospital digestive department and surgery theater doctors, nurses and other health workers.

Tsukuba University Hospital is very modern hospital with cut edge equipment and highly trained professionals.

During my stay, I learned variety of skill and techniques of laparoscopic surgery for colorectal lesions and also gastric tumor.

All the Tsukuba University Hospital staff are very friendly and professional

I really was surprised to see laparoscopic surgeries done in TUH digestive surgery department such as laparoscopic abdominal- peritoneal resection and anus preserving rectum surgery.

At last I would like to warmly thank to UTH :

- Prof Akira Matsumura director of University of Tsukuba Hospital.
- Prof Minoru Akiyama chef office for the Promotion of International Medical Affairs.
- Prof Ohkohchi Nobuhiro director of digestive system surgery.
- Prof Enomoto Tsuyoshi director of gastrointestinal.

And also to Dr Ohara, Dr Hisakura, Dr Akashi, Dr Hara, Dr Araki and Dr Rashad.

Thank you very much for all your support. I have had the great stay in Tsukuba, I did really enjoy it.

Finally I do hope that we continue having good collaboration.

With Dr. Enomoto

With Dr. Rashad
