

◆グエン チ バオ ヴィ (ICU 看護師) 2015 年 10 月 5 日 - 10 月 16 日

<看護部 受入・研修担当>

1. 杉本 敬子 看護師長 (国際・研究担当)
2. 卯野木 健 ICU 看護師長
3. 柴 優子 ICU 副看護師長

Firstly, I would like to thank Director of UTH- Professor Akira Matsumura, Chief OPIMA- Professor Minoru Akiyama and everybody in program cooperation between UTH and CRH. I am very lucky to become a participant in this program. Two weeks is a short time and passed quickly. But I always feel happy, enjoy learning, great experiences and beautiful memories during time staying in Japan. Japan is a developed country, Japanese are always friendly, cheerful, enthusiastic, hardworking....I was very impressed when I came there.

I was visited in a modern & large hospital- UTH, I see many new things about modern science, advanced technology, modern equipment. While studying at the Department of Emergency & Critical Care Medicine, I enjoyed studying here. I saw everybody work hard, scientific, enthusiastic, high responsibility. Your enthusiasm help me a lot when learning and acquiring knowledge. Communication style is also something I want to learn from you, always speaking in a gentle voice, "hello"& "thanks" to everyone. With enough modern equipments, that's useful to take care and follow the patient easier. I like electronic medical records too. I was very impressed when nurses & physiotherapist help mechanically ventilated patients do exercises such as sit up, stand up, walk around. I learn your attitude and effect of teamwork, always having plan & full information, for patients all the best and the most comfortable. I will share my experiences for all colleagues, try to improve myself, and I hope that my contribution is useful for ICU-CRH. Eventhough there are a lot of difficulties but I hope in the near future, CRH will develop more and more.

I greatly appreciate UTH has cooperated with CRH, I hope this relationship will develop long-term and stabilized. I wish for UTH develop and successfully more!
